

Youth photography policy

Any person wishing to photograph Youth Players at Crawley RFC should identify themselves to the team Manager and coaching staff explaining their reason for taking photographs and their relationship to the player (s) before commencing photography.

Any parent or Guardian of a child under court order protection or who do not want their child photographed for any reason should make themselves and child known the team Head Coach and Manager.

The Club will then undertake to take all reasonable steps to ensure the child is not photographed whilst playing or training at the club.

The Club undertakes to gain the consent of any child and parents or guardian before a photograph in which the child can be individually identified is published in the press or on websites by the club.

All club officials are required to challenge anyone they suspect of not having permission, taking photographs of youth players on the pitches and premises. The official should request the photographer explain their reason for taking photographs and their relationship to the player (s). However it should be noted that all the pitches and land surrounding the club are public places. If the photographer gives an inappropriate answer or refuses to answer when challenged, Club officials should request the photographer stops and or leaves, but may take no other action.

Please indicate where you give permission for your child's photograph to be used on the website, newspapers and other promotional material.
